What is a Bone Marrow Transplant?

A Bone Marrow Transplant (BMT) refers to the process of taking sick or diseased bone marrow caused by disease and replacing it with healthy bone marrow, so that the bone marrow transplant recipient has the infection-fighting cells the body needs to stay alive. For thousands of people with life threatening blood disorders such as Leukemia and Lymphoma, a bone marrow transplant literally represents a chance to live. Going through a BMT is usually the last resort to extending someone's life when fighting cancer (it has been an option for other catastrophic diseases.)

If you are over the age of 16 yrs old (with parental consent) and under 60 yrs old who would like to be placed on the Bone Marrow Registry, it is so simple, fill out the application, cotton swabs (big Q-Tip) of your cheeks, no blood, no mess and voila, you may be the next HERO in a persons life! The gift that will be well used, never returned and always loved, LIFE!
